Art Unit: 1732

1.Claim 35 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 is already set forth in claim 18 and hence is indefinite for failing to further limit claim 18.

2.The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Racich et al in view of Sanefuji et al for reasons of record as set forth in paragraph 1 of the previous office action.

3.Applicant's arguments filed March 9, 2006 have been fully considered but they are not persuasive. While the stretching disclosed at column 2 of the primary reference may indeed be that of hot air stretching, applicant is referred to col. 3, line 53 through col. 4, line 56 as generally set forth in the first office action. Stretching in an aqueous boric acid bath is clearly disclosed therein, with a velocity into/out of the bath being .3 and .42 m/min and a residence time in the bath of 3.4 min, which would mean that the distance the polarizer travels through the bath during the stretching is somewhere on the order of 1 meter—ie, speed x time. See column 4, lines 14-31 in particular. It is respectfully submitted that the primary reference, when taken in combination with that

taught in the secondary reference, would have rendered the instant claims obvious for reasons already noted.

4.THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
